

## Genetic testing — Survey questions

*It is now possible to buy personal genetic tests. These test results tell a person his or her risk of developing different diseases during life based upon their genetic code. People can buy these tests by themselves, without a doctor's order.*

*The tests are done at home on a sample of saliva and the results are mailed to you.*

*Personal genetic testing provides your risk of developing a number of different diseases, including:*

- *specific types of cancer (e.g., breast, prostate, colon)*
- *some common health problems (e.g., obesity, diabetes, heart disease)*
- *some less common illnesses (e.g., Crohn's disease, rheumatoid arthritis, Parkinson's disease)*

Q1. How interested would you be in getting personal genetic testing for yourself?

- Very interested
- Somewhat interested
- Not interested

Q2. How interested would you be in getting personal genetic testing for your **[INSERT AGE OF YOUNGEST CHILD; 0-5 MONTH-OLD, 6-11 MONTH-OLD OR X-YEAR-OLD]** child?

- Very interested
- Somewhat interested
- Not interested

Q3. Please indicate your level of agreement on the following statements about personal genetic testing for children:

*Please check one box in each row*

<b><i>Personal genetic testing for children ...</i></b>	<b>Strongly Disagree</b>	<b>Disagree</b>	<b>Agree</b>	<b>Strongly Agree</b>
may help parents recognize a child's health problems earlier				
may give parents the chance to do things that might prevent their child from developing a certain disease				
may lead to discrimination against a child because of his/her genetic risk of disease				
may make parents worry too much about their child's future health
