

e-Cigarette — Survey questions

This next set of questions is about a new product.

Q1. Have you ever heard of electronic cigarettes, or “e-cigarettes”?

Yes

No

[NEW SCREEN]

Electronic cigarettes, or “e-cigarettes”, are battery-operated devices that look like cigarettes, but do not contain tobacco. E-cigarettes contain nicotine, which is inhaled as a mist.

E-cigarettes come in flavors like tobacco, chocolate and vanilla. They are available in stores, mall kiosks and over the Internet. Unlike tobacco cigarettes, sales of e-cigarettes are not restricted for people under 18.

Currently, e-cigarettes are not regulated by the US Food and Drug Administration (FDA).

[NEW SCREEN]

Those against e-cigarettes say:

- *they have not been thoroughly tested for safety*
- *they may lead to nicotine addiction and tobacco use among young people*
- *they should be regulated by the FDA like other nicotine products (such as patches, lozenges and gum)*
- *the FDA analyzed a small sample of e-cigarettes and found they may contain chemicals that could be harmful*

Those in favor of e-cigarettes say:

- *they are a safe substitute for tobacco cigarettes*
- *several lab reports have been published on the safety of e-cigarettes*
- *contents in e-cigarettes are on the FDA's ‘Generally Recognized As Safe’ list*
