

Parental Worries About H1N1 Vaccination —Survey questions

In 2009, a new type of influenza, called H1N1 or “swine” flu, spread to over 70 countries around the world, including the United States.

This flu season a new vaccine against H1N1 influenza was made available to the public. There are two forms of the H1N1 flu vaccine – as the flu shot (injection) or as a nasal spray.

[IF PARENT AND HAS CHILD AGE 1 OR OLDER, SHOW AGE OF YOUNGEST CHILD AT LEAST 1 YEAR OLD]
